

## Freddie Mac ACE+ PDR Solution

## 1 August 2022

AXIS Appraisal Management Solutions' Modern Valuation Group has developed exciting new products to meet the demand for desktop hybrid appraisal products, and Freddie Mac's ACE+ PDR solution.

San Rafael, CA – **AXIS Appraisal Management Solutions** today announced it is prepared for an August launch to support Freddie Mac's ACE+ PDR solution.

AXIS has partnered with best-in-class-technology and property data collection services to further modernize the valuation industry. ACE+ PDR is a natural evolution for our <u>Modern Valuation Group</u> (MVG) which already supports governmentsponsored enterprise (GSE) desktops, our proprietary Latitude Desktop products, and AVM Reconciliations.

"The Modern Valuation Group was created to ensure AXIS was well-positioned for the future of the valuation industry's movement towards modernization, combining expertise, technology and a robust Quality Control process", says Chad Karol, Director of Operations of AXIS' Modern Valuation Group. "We have a full suite of valuation products to meet all lending needs, whether that's an AVM Reconciliation, our proprietary hybrid Latitude products, or GSE desktop and hybrid solutions."

AXIS makes integrations seamless for ease of transmissions and real-time status updates and AXIS' robust quality control processes are second-to-none, ensuring reports are delivered quickly with minimal delays.
